

ELIMFILTERS®

Technical Value Brief

Total Asset Protection Systems

ELIMFILTERS develops filtration around the operating conditions of the protected asset. The platform is organized around five protection systems: Air Intake & Airflow Protection, Fuel Cleanliness Protection, Cooling System Protection, Lubrication/Oil Systems, and Hydraulic Systems.

Distributor value

- Structured product and application intelligence
- Technical knowledge for industrial, heavy-duty, fleet and equipment markets
- Digital tools that support product identification and market development
- A distributor-first commercial model designed for recurring local demand
